# TIHAYA CAPSULES

***Medication Information Leaflet***

**Product Name:** Reconstitution Carrier Capsules
**Dosage Form:** Hard gelatin capsules containing compounded powder

**1. Composition**
**Herbal Components (approx. 40%)**
- Mandrake root powder
- Dragon's blood resin powder
- Dried snow lotus powder

**Gemstone Components (approx. 60%)**
- Sapphire powder (calcined)
- Ruby powder (calcined)
- Emerald powder (calcined)
- Diamond micro-powder (calcined)

All gemstones are subjected to high-temperature calcination at temperatures exceeding **2000°C,** then naturally cooled, finely ground, and repeatedly sieved to achieve a uniform powder consistency.

**2. Description**
Capsules contain a fine powder displaying a deep red and pale blue blended hue.
Odorless.
Uniform, smooth texture.

**3. Preparation Process (Basic Compounding Procedure)**
1. Herbs are air-dried completely.
2. Each herb is finely ground and sieved three times.
3. Gemstones are calcined at temperatures above 2000°C.
4. After natural cooling, they are ground into ultra-fine powder.
5. Herbal and gemstone powders are blended according to specified ratios.
6. The final mixture is encapsulated and sealed in hard capsules.

**4. Dosage and Administration**
- Take 5–7 capsules per dose.
- Three times daily.
- Continue for three months.

The carrier effect initiates upon the first administration.
The three-month period serves as a stabilization phase.
No further intake is required after completion of the course.

**5. Functional Description (Setting-Specific)**
Upon administration, a stable carrier core is established within the body.
In the event of complete physical destruction, this core preserves conscious continuity and existential integrity.
It subsequently absorbs surrounding natural materials (including air, water, and mineral substances) to gradually reconstruct the body in full.
Consciousness remains bound to the carrier core throughout the process.

**6. Disclaimer**
This product exists within a fictional framework.
Use constitutes full acceptance of its mechanisms and long-term implications.
No additional guarantees are provided.
The product does not claim to eliminate suffering or psychological burden.
Administration is irreversible.
Use only on a fully voluntary basis.
